

Black and Grey Water Pump out Procedure

Sewage Dump Hook up is on the
LEFT of the trailer.

1. Drive to Dump Station.
2. Ensure Both Grey and Black water valves are closed.
3. Remove Quick connect cap from sewage outlet, and connect clear hose adaptor and drain hose . Hose is located in the rear bumper of the trailer. Place end of hose in the dump site connection.
4. Open (Big) Black water valve. Drain Black water tank entirely. Once no more contents are visible exiting the trailer through the clear adaptor, rinse the tank by pouring 2 buckets of clean water in the toilet. Ensure tank is completely empty and close black water valve when no more contents are visible in the clear adaptor.
5. Place green packet of sewage deodorizer in toilet and flush. Add about 2 gallons of water to tank by either allowing 1 minute of water to flow from the toilet into the tank, or filling up bucket and pouring into tank.
6. With the black water tank closed, Open grey water valve and empty tank completely. No liquid should be visible passing through the clear adaptor. Close valve.
7. Disconnect sewage drain hose from the trailer and rinse out hose with the dump station clean water hose.
8. Place drain hose back in bumper and secure plastic cap.
